Subject: Upper Animas with County Commissioners

Hi All,

I reached out to the San Juan County Commissioner's to see about their availability for meeting one on one with Martin on the morning of the 24th. Unfortunately none of them are available. They are all leaving town very early in the am. What I did find out is that while you are on the agenda for an hour on the 23rd they've arranged to have a very light agenda so you can in fact have more than an hour if need be.

While I was talking with Commissioner McKay he had some additional questions he would like answer's to by next week. I believe we may already have a couple of these on our current communication strategy under the Q&A's. They are:

1. Can EPA put in a bulkhead at the Red and Bonita without Superfund? He somehow came up with an estimated cost of \$750,000 to 1.5 million to install a bulkhead.
2. Would it be possible to place a treatment plant in the wetlands and if so, who would pay for that? Would it be an experimental treatment or full scale?
3. They would like a final determination on Sunnyside's liability. Is it only through the Superfund process that the final determination can be made?

Question 1 above is similar to questions 7 and 8 in the communication strategy.

Question 3 above may already be addressed in questions 5 and 6 of the communication strategy.

Please share this email with any others I may have missed.

Sincerely, Libby

Libby Faulk, PAI Unit Supervisor
